Why is quality important when choosing products from health and well-being?

Ensuring a healthy life and promoting well-being for all at all ages is important for building prosperous societies.

The importance of acquiring a good sterilizer

Sterilization is important because this task eliminates all forms of microscopic life, thus avoiding the risk of transmitting infections.

How necessary is proper hand washing?

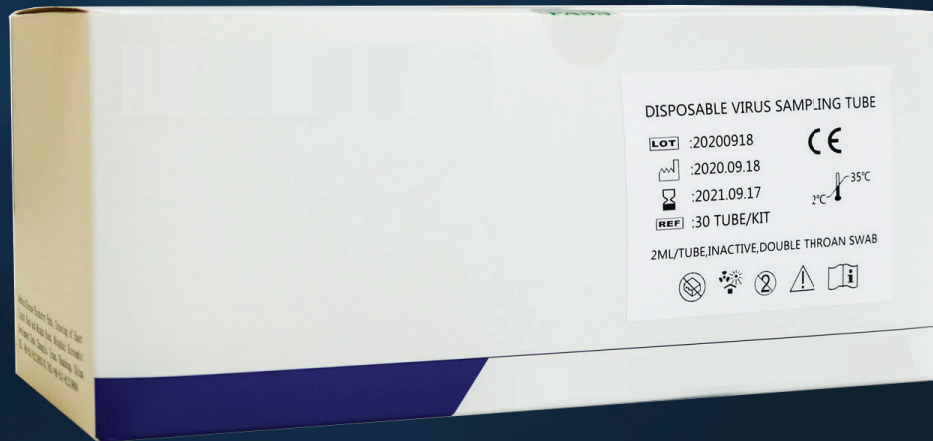

Proper hand washing is the first line of defense against spread of many diseases.

Why choose to buy from Sanidad Distributor?

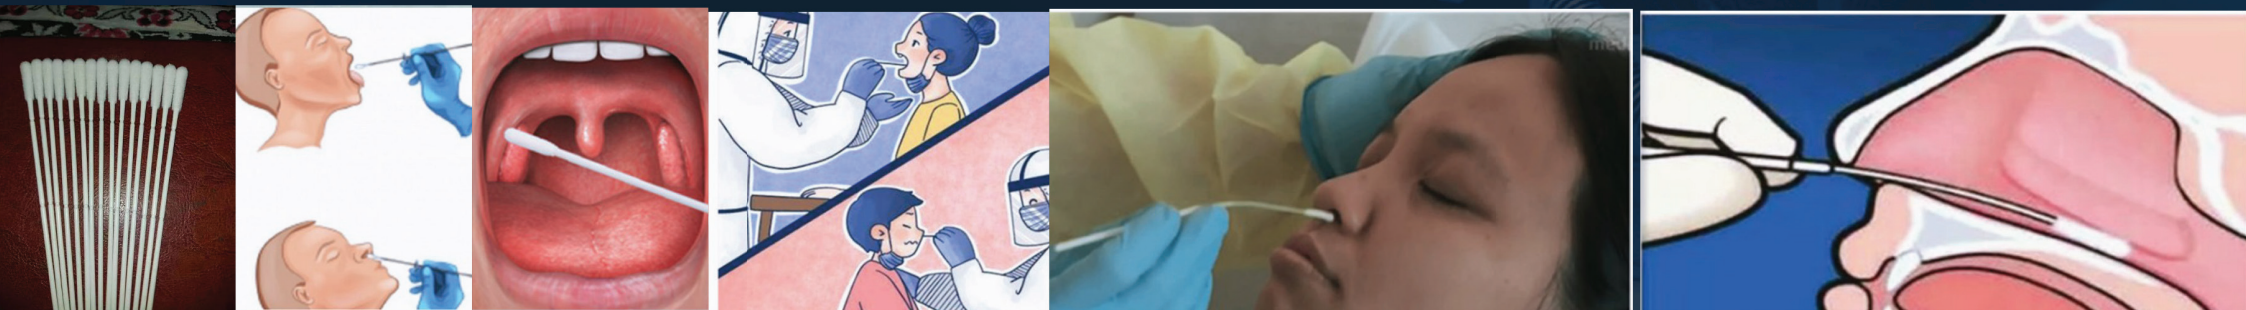

Sanidad Distributor provides you with the most advanced products and equipment in the industry, we specialize in deep cleaning systems for the environment industrial, commercial and residential work to ensure the health of their associates and guests.

Disposable Virus

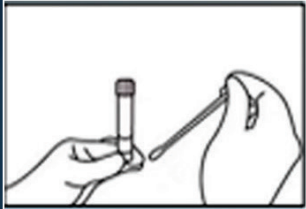

- *Easy to operate and use
- *Adding virus stabilizing ingredient can maintain the activity of the virus in a wide temperature range and reduce the decomposition rate of the virus (active type)
- Contains virus cleavage and virus nucleic acid preservation solution, which can quickly cleave the virus to release nucleic acid and store the nucleic stably (inactive type)

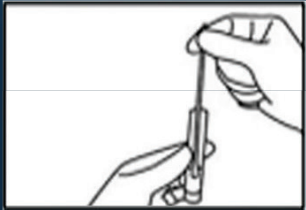

Test Procedures

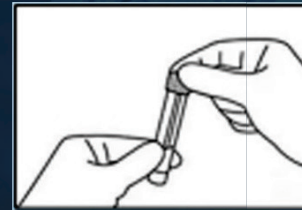

1. According to different sampling requirements use a sampling swab to sample at the corresponding part

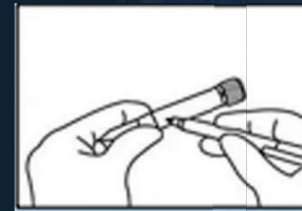

2. Place the swab after collecting the sample in a sterile sampling tube

3. Put the swab into the preservation solution and break it from the breaking point

4. Tighten the sterile sampling tube cover

5. Mark the relevant sample information on the label of the sampling tube

Medium Specification	5ml tube with 2ml medium, 10ml tube with 3ml/5ml/6ml medium	
Boxed Specifications	2ml medium type without swab/single swab/double swabs	30 tubes/box
	3ml medium type without swab/single swab/double swabs	20 tubes/box
	5ml medium type with 5 swabs	15 tubes/box
	6ml medium type with 10 swabs (only for Inactive type)	10 tubes/box
Package Size	570*540*570mm 50boxes/carton

Digital Desinfectant Gun DDG-95

1-. What kinds of chemicals does each product use?

- This equipment uses both solid chemicals and liquid chemicals. Solid disinfection must be melted before being poured into the recipient.

2-. How much chemical is diluted in each piece of equipment and what type of water does it use?

- The user manual of the disinfectant should be followed, if the disinfectant products do not have the manual, the proportion of products should be 1 measure for every 10 of water. Highly concentrated disinfectants are corrosive.

3-. How many square feet does each Digital Disinfectant Gun DDG-95 cover in operation?

- Spray distance is 8-10m (adjustable), spray width is 1.3-5m in straight spray range. Can be covered 100 m² for 15 minutes.

4-. If it has a filter or not, what kind of filter would it be?

- It has a filter and is cross-linked.

5-. If it requires maintenance, how often should it be done and what would it be like?

Clean the filter after the machine works for 20-30 hours.

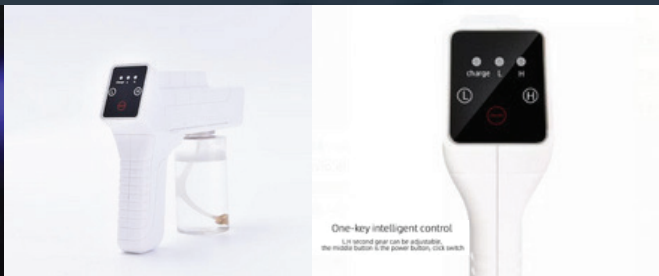

After use, pour clean water into the container to clean, then turn on the machine and spray the water for 3 minutes.

Pull out the plug after use to avoid danger.

If it is not used for a long time, it should be cleaned and kept dry before storage.

Operation in use:

Do not exceed the scale when adding liquid chemical to avoid overflow. When you stop spraying, close the regulating valve of liquid medicine and then turn it off.

Smart AIR Sterilization Purifier SASP-95

Type: Ozone Air Sterilization
 Model Number: JX-SJB01
 Instrument classification: class I
 After-sale Service: Free spare parts
 Function: Inactivate Virus, Bacteria Killing, Clean Air
 Amount of Ozone: 300-2000mg/h
 Circulating Air Volume: 450-1200m³/h
 Certificates: CE, CCC, ISO
 Application area: 20-100m²
 Material: Coated metal
 Dimension: 66*21*26cm
 Weight: 5.75kg
 Application scenarios: Home, Office, Commercial, Industrial
1 Year Warranty

CANAL MARKET

Smart AIR Sterilization Purifier SASP-95

1-. What kinds of chemicals does each product use?

- This equipment uses UV, ozone, negative ion and filter.

2-. How much chemical is diluted in each piece of equipment and what type of water does it use?

- UV253nm, ozone 500mg, negative ions 200,000,000; no water is needed.

3-. How many square feet does each running device of the Smart AIR Sterilization Purifier SASP-95 cover?

- This equipment is good enough for 3500 cubic feet, around 35m to reach 2ppm, and sterilize for 5m + for a regular disinfection (for hospitals, sterilize at 10 ppm for 5 m +). If you need to disinfect faster, you can choose 1000mg instead.

4-. If it has a filter or not, what kind of filter would it be?

- Has optional h11, h12-14 filter, or h11 + activated carbon filter (MOQ 500 units).

5-. If it requires maintenance, how often should it be done and what would it be like?

- You do not need daily maintenance, just clean the dust from time to time; the filter can be changed every 6 months (depending on the air environment), UV rays last 6 months and ozone can be checked by professionals while the filter is changed every 6 months.

Mini UV-OZONE Air Purifier MOP-95

1-. What kinds of chemicals does each product use?

- This equipment does not use chemicals.

2-. How many square feet does each Mini UV-OZONE Air Purifier MOP-95 cover in operation?

- Spray distance about 300 square feet.

3-. If it has a filter or not, what kind of filter would it be?

- It has a filter inside, we use H10 grade HEPA filter. Replaces 4-6 months, final decision is based on usage and environment surrounding. This filter can decompose toxic gases and sterilize, especially to inhibit pollution.

4-. If it requires maintenance, how often should it be done and what would it be like?

-The filter can be cleaned, you can use a hair dryer or vacuum cleaner to suck up the dust.

-Do not turn on the air purifier for 24 hours. Generally, such a long time will greatly affect the consumables increase the usage cost

Robot Floor and Air Desinfection Cleaner RDC-N95

Application area:120m²

Remote Control: Yes

Anti-collision height Obstacles should be higher than 3cm ,the diameter should be longer than 1cm

Water tank Capacity: 1100ml

Power: 25w

Voltage (V):12, 12v

Lithium battery: 2600MAH

Charing Time: 3-4 hours

Running Time: 60-80minutes

Size (Diameter*height): 20*18cm

Robot Floor and Air Desinfection Cleaner RDC-N95

- 1-. What kinds of chemicals does each product use?
- This uses disinfectant liquid, do not fill the water tank with abrasive or corrosive chemicals.
- 2-. How many square feet does each Mini UV-OZONE Air Purifier MOP-95 cover in operation?
- 120m²
- 3-. If it has a filter or not, what kind of filter would it be?
- It does not use a filter.
- 4-. If it requires maintenance, how often should it be done and what would it be like?
- Consult the user manual

Digital Sterilization DS-95 1st Generation

Applicable Industries: Hotels, Building Material Shops, Manufacturing Plant, farms, restaurant, HOME USE, Retail, Food Shop, Construction works

Core Components: PLC

Voltage: 100-240V

Power: 80w

Weight: 5kg

Capacity: 13L

Humidifying Capacity: 60 m²

Application: hotel,home, office, commercial, outdoor

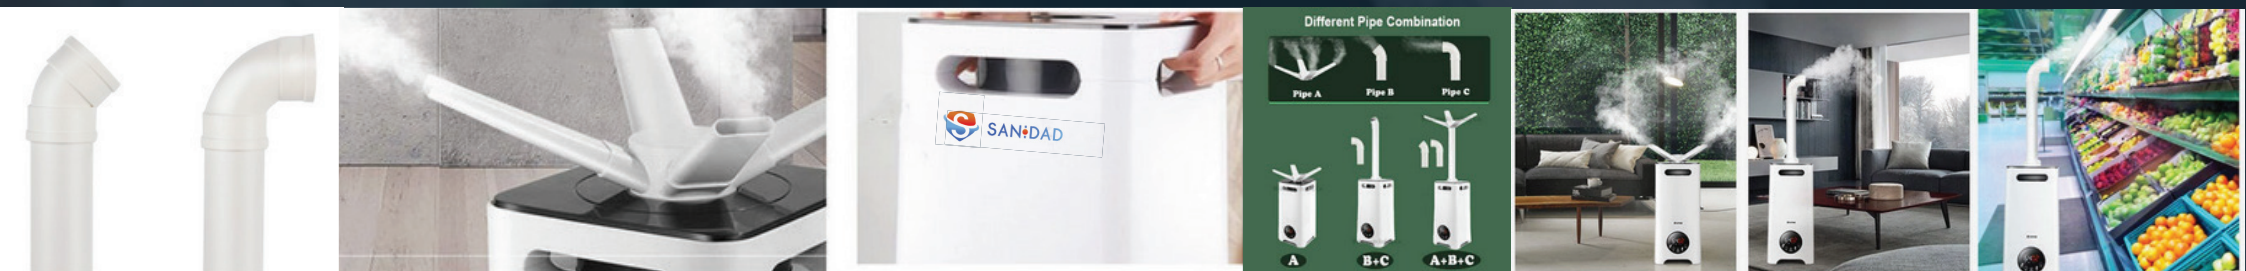

Power: 110-240V

Control: remote control

Material: ABS and AS

Sterilization Type: Ultrasonic Humidifier

1 Year Warranty

Digital Sterilization DS-95 1st Generation

1-. What kinds of chemicals does each product use?

- It is better to use hypochlorous acid, do not use oil and alcohol, do not use strong hypochlorous acid. It better be medicinal grade hypochlorous acid which is alsoused to wash hands. Strong hypochlorous acid will harm people, animals, plants, etc.

2-. How much chemical is diluted in each piece of equipment and what type of water does it use?

-When using medical grade hypochlorous acid, if there are humans around, please mix more water with hypochlorous acid, if not, you can mix less water, you can also use solid chemicals, you need to follow the instructions.

3-. How many square feet does each Digital Sterilization DS-95 equipment in operation cover?

- In the user manual you can get more detailed information.

4-. If it has a filter or not, what kind of filter would it be?

- If it has filter, it is a small black filter, the main part is activated carbon which can absorb dirty air.

5-. If it requires maintenance, how often should it be done and what would it be like?

- A small soft brush can be used to wash it every few days, using only clean water. In the user manual you can get more detailed information.

Industrial Fogger IF-95 whit control remote

1-. What kinds of chemicals does each product use?

- This equipment uses chemical products such as NaClO, ClO₂ among others. Use chemicals in liquids.

2-. How much chemical is diluted in each piece of equipment and what type of water does it use?

- You should use 200L of disinfectant and running water.

3-. How many square feet does each Industrial Fogger IF-95 operating equipment cover?

- The spray distance is 15-30m (adjustable), it can rotate 270 degrees.

4-. If it has a filter or not, what kind of filter would it be?

- Does not use filters.

5-. If it requires maintenance, how often should it be done and what would it be like?

- The maintenance instructions can be seen in the operation manual.

SANIDAD CLO-95

100 tablets x bottle

El dióxido de cloro (ClO₂) es un compuesto químico que consta de un átomo de cloro y dos átomos de oxígeno. Es un gas de color rojizo a verde amarillento a temperatura ambiente que se disuelve en agua. Se utiliza para una variedad de usos antimicrobianos, incluida la desinfección del agua potable. El dióxido de cloro gaseoso generalmente se produce in situ a partir de clorato de sodio o clorito de sodio.

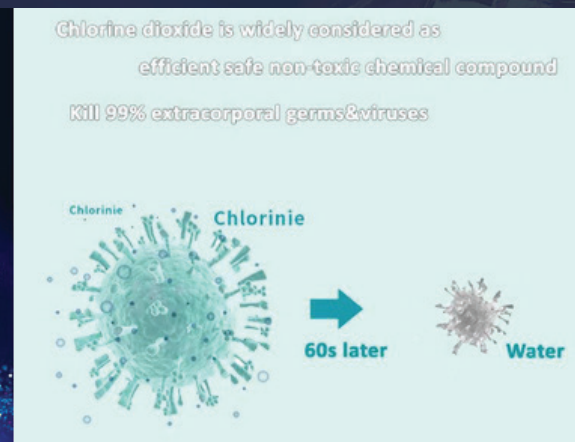

Potente desinfección en el tratamiento de agua

El dióxido de cloro es un desinfectante. Cuando se agrega al agua potable, ayuda a destruir bacterias, virus y algunos tipos de parásitos que pueden enfermar a las personas, como *Cryptosporidium parvum* y *Giardia lamblia*. La Agencia de Protección Ambiental (EPA) regula la concentración máxima de dióxido de cloro en el agua potable para que no supere las 0,8 partes por millón (ppm).

Aplicaciones médicas, en hospitales y otros entornos sanitarios, el gas de dióxido de cloro ayuda a esterilizar equipos, superficies, salas y herramientas médicos y de laboratorio. Los investigadores han descubierto que en concentraciones adecuadas, el dióxido de cloro es seguro y eficaz para ayudar a eliminar la bacteria *Legionella pneumophila* que puede causar la enfermedad del legionario, un tipo de neumonía potencialmente mortal.

Modo de Uso

Para el equipo de Sanidad que requiera uso de químicos es recomendable usar 1 tableta por cada litro de agua, Los productos desinfectantes con alta concentración son corrosivos.

Car Air Purifier

One machine has many functions:
Anion, air purification
Ultraviolet sterilization
ozone disinfection
Add fragrance
Material: ABS
Specification: 8 PCS / carton
Product size: 14*14*28CM
Function: Air purification, ultraviolet sterilization
active oxygen disinfection fragrance and fresh air
Time to replace the filter: 4 month
(According to the use environment)
Application area: 20-30m²
Active oxygen concentration: 50-80mg / h

Car Air Purifier

Smart touch screen: Index display in the large screen, convenient and timely adjustment, for you to create a comfortable and healthy environment.

High efficiency composite filter

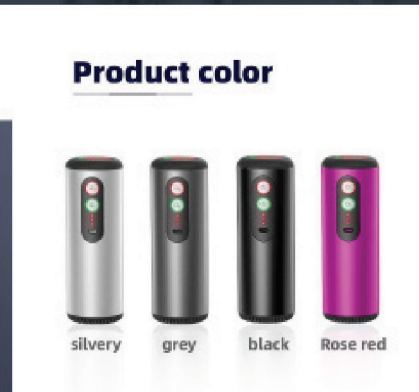

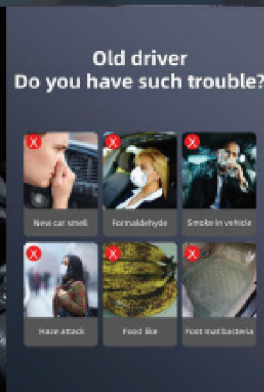

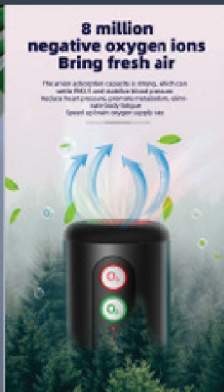

HEPA filter: filters large particles from the air

Anion: effectively remove all kinds of harmful gases and odors in the air.

Design: very simple and por

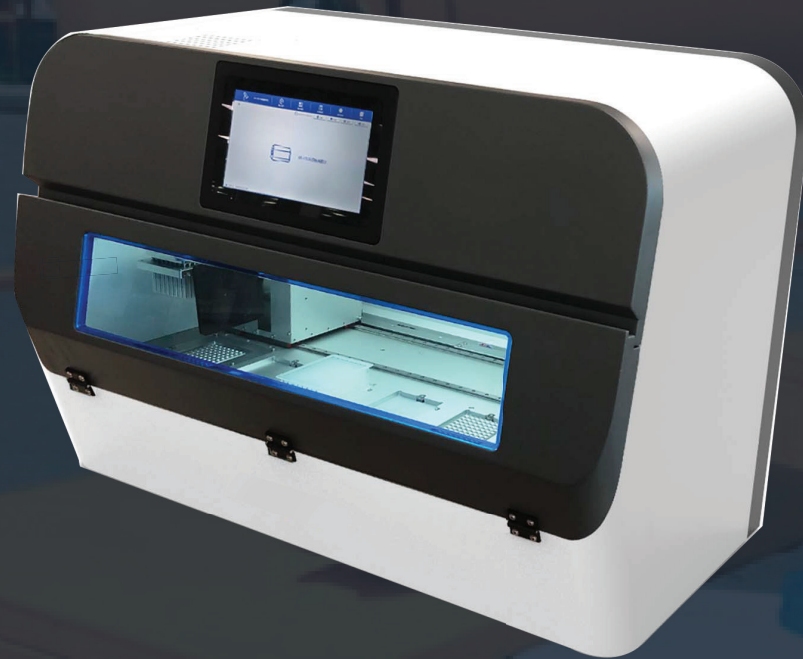

Used for home, bedroom, car and household.

and big efficiency.

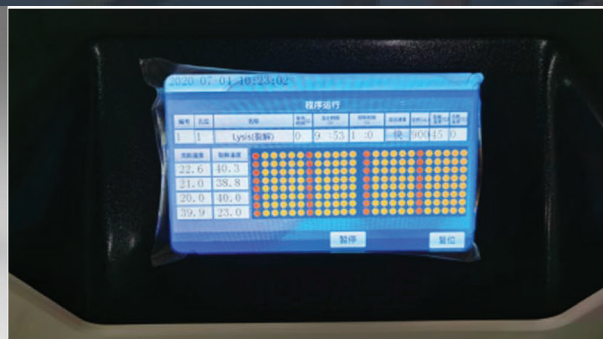

NUCLEIC ACID EXTRACTION SYSTEM

-Display: 10.1 inch touch screen, easy to operate
Accurate temperature control and rapid temperature rise, can be adopted to actively reduce to room temperature and store samples in a short time at low temperature

-The module is integrated with shocking and heating, which can be mixed with shock while heating, saving extraction time

-Equipped with ultraviolet disinfection lamp, HDPE high efficiency filter and safety door protection function it can effectively prevent aerosol pollution

FLUORESCENCE QUANTITATIVE PCR DETECTION SYSTEM

- Whole block scanning and formulated line scanning mode, 96 well double-colour scanning takes only 5.5s
- 6 channels fluorescence detection, no cross talk between different channels
- Unique bottom detection, compatible to reaction volume down to 5ul
- New automatic hot lid, automatic open and close which is prevent reagent evaporation
- LED excitation light source whit super long service life
- New TE module whit special technique to ensure long service life
- Avalibre for a variety of scientific research and clinical applications

UV AIR STERILIZER

Application

It is suitable for dynamic indoor air disinfection in class II, III and IV environments of hospitals, family, school, library, blood station, food and beverage factory, pharmaceutical factory, catering and other public places.

Features

1. Display indoor temperature.
2. Timing function of UV lamp cumulative use.
3. Adopt quick disassembly filter, easy to clean and maintain
4. Air volume status display, high /medium/low air volume adjustable.
5. Built-in high brightness, long life, ozone-free, U-type UV lamp
6. The super-infrared receiving device can realize long-distance remote control and easy operation at any 45 degrees. A built-in hidden remote control is placed to prevent the remote from being lost.
7. Single chip microcomputer control, stable and reliable. Touch panel operation, convenient for man-machine interaction.
8. High quality mirror plate is used to enhance the radiation intensity of ultraviolet lamp and improve the sterilization efficiency.

PLASMA AIR STERILIZER (WALL MOUNTED)

Application

It is mainly suitable for public places such as hospitals, pharmaceutical factories, food factories, hotels, kindergartens, schools, food and catering industry, public entertainment venues, offices, canteens, families, vehicles and ships, funeral homes

Features

1. High, medium and low wind speed are adjustable.
2. Infrared remote control is adopted, which is simple to operate and easy to use.
3. Whit power-off memory function, power-on automatic recovery.
4. No harmful substances are produced in the process, no secondary pollution to the environment, and no harm to the human body.
5. Timing sterilization function: The machine can set the start and end time of sterilization according to different use environment.
6. Can display real-time time.

UV AIR STERILIZER (MOBILE)

Application

It is suitable for dynamic indoor air disinfection in class II, III, IV environments of hospitals, family, school, library, blood station, food and beverage factory, pharmaceutical factory, catering and other public places.

Features

1. Display indoor temperature.
2. Timing function of UV lamp cumulative use.
3. Air volume status display, high/medium/low air volume adjustable.
4. Adopt quick disassembly filter, easy to clean and maintain.
5. Built-in high brightness, long life, ozone-free, U-type UV lamp
6. The super Infrared receiving device can realize long-distance remote control and easy operation at any 45 degrees. A built-in hidden remote control is placed to prevent the remote from being lost.
7. Single chip microcomputer control, stable and reliable. Touch panel operation, convenient for man-machine interaction.
8. High quality mirror plate is used to enhance the radiation intensity of ultraviolet lamp and improve the sterilization efficiency.

UV AIR STERILIZER (MOBILE)

Application

It is suitable for dynamic indoor air disinfection in class II, III, IV environments of hospitals, family, school, library, blood station, food and beverage factory, pharmaceutical factory, catering and other public places.

Features

1. Silent swivel casters, easy to move.
2. Manually controlled disinfection operation.
3. Illuminated boat switch, one button to turn on and off.
4. Using long-life, C-band (wavelength 253.7 nm) ozone-free ultraviolet circulating wind antibacterial antivirus.
5. Using quick disassembly shell, convenient for daily cleaning and maintenance and circulating air with silent fan.
6. It adopts the unique structure of side air inlet and air outlet before, which reduces the reserved space at the rear and can be placed against the wall.

PLASMA AIR STERILIZER (WALL MOUNTED)

Application

It is suitable for general operating room, delivery room, blood ward, burn ward, protective isolation ward, intensive care unit, disinfection supply center, intensive dialysis center, examination room, treatment room, infectious disease consultation room, etc

Features

1. Human and machine coexistence
2. It can effectively remove organic organic gases and various odors in hospitals.
3. High sterilization efficiency and good dust accumulation effect.
4. Real-time monitoring of indoor air temperature
5. Three gears adjustable wind speed.
6. Multiple working modes: manual, timing, temporary.
7. 6 groups program-controlled timing disinfection.
8. Automatic accumulation of working hours.
9. LCD display, far infrared remote control.

Disinfection Robot

1. Toxic Sterilization robot is a unviersal wheeled chassis.
2. Ultraviolet sterilization lamp
3. Suitable for shopping malls, homes, schools office areas, and other places where sterilization can be blocked.
4. Lidar can realize all-round scanning and distance detection of the surrounding environment.
5. Robot is driven by a high-density lithium battery.
